WILSON BROBO SEDURIFA

Web Developer | Django & Laravel
Tibig, Bulakan, Bulacan | 0981 296 5644 | wilsonsedurifa66@gmail.com

SUMMARY

Web developer specializing in Django and Laravel, currently building and maintaining a scholarship application system for the Provincial Government of Bulacan. Comfortable owning a feature end to end, from PostgreSQL/MySQL database design to the staff-facing UI, and working directly with government staff to turn manual, spreadsheet-based processes into structured web workflows.

EXPERIENCE

IT Staff / Web Developer
2026 – Present

Provincial Information Technology Office of Bulacan

- Develop and maintain the Scholarship Management System (Django) first built during OJT, shipping new features requested directly by program staff.
- Provide day-to-day IT support to provincial office staff, including hardware/software troubleshooting and system setup.

Web Developer Intern
Aug 2025 – Dec 2025

Provincial Information Technology Office of Bulacan

- Built the initial version of the Scholarship Management System in Python (Django), covering slot management by municipality and education level (Junior High, Senior High, Masteral, Board Review) with Public/Private and single-pool capacity modes.
- Designed and managed the system's PostgreSQL database schema.
- Refined features and usability with the IT team based on program staff feedback; completed structured training in hardware/software troubleshooting and office productivity tools.

PROJECTS

ScholarshipSystem — Province-Wide Scholarship Slot Portal (Django)
2025 – Present

- Building a staff portal on a PostgreSQL database covering all districts and municipalities/cities of Bulacan, managing scholarship application slots by District → Municipality → Education Level, with Public/Private and single-pool capacity modes. Currently in pre-deployment.
- Built a batch allocation workflow that lets staff stage slot changes across multiple districts and municipalities in a single save-preview list before committing to the database, replacing one-at-a-time setup with a single pass.
- Reworking the publication system so staff can schedule when each education level/school type goes live per semester, with status tracking (Not scheduled, Scheduled, Published, Paused) and full change history.
- Implemented QR code generation and a built-in QR scanner so staff can verify and approve scholarship applicants quickly with a single scan.
- Integrated an AI chatbot using the Hugging Face API, deployed through Telegram so applicants can get assistance directly.

Simple Task Tracker — Full-Stack Task Management App (Laravel)
2026

- Built a full-stack task manager in Laravel, MySQL, and Blade with a REST API, session-based authentication, and per-user task scoping, covering priorities, due dates, and completion tracking.
- Wrote a PHP task-sorting module (priority, then oldest first) with PHPUnit tests, and built the frontend with vanilla JavaScript fetch calls against the API.

EDUCATION

Bachelor of Science in Information Systems
2022 – 2026

Bulacan Polytechnic College

SKILLS

Frameworks: Django (Django Templates), Laravel (Blade), Flutter
Languages: Python, PHP, JavaScript, Dart, C#, C, C++
Databases: PostgreSQL, MySQL
Frontend: HTML5, CSS3, JavaScript, Bootstrap 5, Tailwind CSS, Chart.js, Bootstrap Icons, Font Awesome
APIs: Hugging Face API, Telegram Bot API
Tools: AI-assisted development (Claude, Cursor, ChatGPT), IT support, Microsoft Office Suite

CERTIFICATIONS

- Digital Literacy Training: Introduction to Cybersecurity and Cyber Hygiene — DICT & Cisco Networking Academy
- Python Essentials 1 and 2 (Python Institute); Prompt Engineering — Cisco Networking Academy
